MONDIAL

Energy Inc.

As one of Canada's largest owners of solar energy systems, Mondial Energy is well placed to help your organization achieve its renewable energy goals. Based on a built portfolio of over 10,000 sq.ft. of solar panels - monitored in real time, Mondial has the construction experience, performance database, cost data and world-wide industry contacts to tackle all scales of solar and other renewable energy projects. From flat plate solar thermal collectors, to thin film PV systems, to megawatt-scale concentrating solar power (CSP) systems, Mondial has the experience needed to develop, quantify and deliver your project.

Services will be tailored to each client:

- Building evaluation for solar and other renewable energy strategies (wind, geothermal)
- Utility analysis
- System concept designs
- Costing
- Energy modeling
- Project management
- Commissioning
- Grant applications
- Performance evaluation
- System monitoring
- LEED applications
